

Evaluation of POC Testing

Primary Care

- Urinalysis: 10 urine components tested (pH, blood, protein, ketones, specific gravity, leukocytes, nitrite, urobilinogen, glucose, bilirubin)
- HgbA1C: Hemoglobin A1C
- Respiratory Testing
 - SARS-CoV-2
 - Influenza A/B
 - RSV (Respiratory Syncytial Virus)
- Strep, Group A Test: Group A Streptococcus
- Mono: Infectious Mononucleosis
- iFob: Immunochemical Fecal Occult Blood
- DOAS: Drugs of Abuse Screen (various metabolites available)
- Glucose: Whole Blood Fingerstick glucose
- oUpreg: BetaHCG, urine pregnancy

Specialty Care

- Endo: HgbA1c, UA
- Oncology:
 - CBC: Complete Blood Count (RBC, WBC, Platelets, Hematocrit and Hemoglobin and additional supporting parameters)
 - CMP: Comprehensive Metabolic Panel (Alkaline phosphatase, alanine aminotransferase, aspartate aminotransferase, bilirubin, blood urea nitrogen, creatinine, sodium, potassium, carbon dioxide, chloride, albumin, total protein, glucose, and calcium.
- Womens:
 - GC/CR- Gonorrhea, Chlamydia
 - Vaginosis panel-Bacterial vaginosis, Trichomonas, Yeast
 - ROM-Rupture of Membrane
 - pH nitrazine paper
 - Scope: Microscopic analysis for clue cells, Trichomonas, and yeast
- Pediatrics:
 - Lead Analysis
 - Hemoglobin

Specialty Care

- Urology:
 - Urinalysis
 - Scope: urine sediment analysis
- Rheum:
 - Scope: crystal analysis
- Anti Coag:
 - INR: Prothrombin time/INR

Evaluation of POC Testing

Urgent Care (Waived)

- Everything above but: *subtract HgbA1C and iFOB*
- Add
 - *BMP: Basic Metabolic Panel (calcium, carbon dioxide, chloride, creatinine, glucose, potassium, sodium, urea nitrogen)*
- *Guaiac: Fecal Occult blood by Guaiac method*
- *INR*

Urgent Care (Non-Waived)

- Everything above and:
- Add
 - *lactate*
 - *Blood gases: pH, pO₂, pCO₂*
 - *BMP*
- *Maybe Troponin and CBC*

Ambulatory Surgery Center

- *Urinalysis*
- *Glucosae*
- *Urine Pregnancy*
- *PT/INR*
- *Drugs of Abuse*
- *Nicotine (Plastic surgery only)*
- *Non Waived, where needed: Blood gases, BMP, ACT, O₂Sat/tHg*

FSED (Non-Waived)

- All of the above and add:
 - *D-dimer*
 - *Troponin*
 - *CBC*
 - *Blood Gases*
 - *pH paper*
 - *Liver Function Testing (alanine transaminase, asparatate transaminase, alkaline phosphatase, albumin, total protein, bilirubin, gamma-glutamyl transferase, L-lactate dehydrogenase)*
 - *Maybe Fentanyl testing, HIV*
